OUR MISSION IS

To help SDSU students develop and maintain lifelong health and well-being through campus wide and individual health promotion and education, and through cost-effective, convenient and high quality professional medical care.

Eligibility: These services are provided automatically to all enrolled, registered students of San Diego State University. This excludes extension, open-university students and English as a second language students.

In order to be seen by a medical provider or have a vision exam, you must make an appointment in advance. Any appointment that you cannot keep must be cancelled. As soon as you have an appointment, please go to the Student Health Services located in the Administration building office 104D and request a health services waiver. Without this waiver, you will be responsible for payment of your visit.

Confidentiality: All medical services are strictly confidential. No one can obtain any information from your medical record without your written permission.

The Student Health Services provides the following services:
- Basic health care
- Measles and Rubella immunization
- CPR classes
- Vision exams
- Basic dental services

Optional Health Insurance: SDSU Associated Students offer health insurance to cover medical needs beyond the basic services provided by SHS. The CSU Healthlink medical plans were designed specifically for the CSU student. The plans are school sponsored and meet all of the CSU and government insurance requirements. With everything you have to pay for in college, buying health insurance is probably the last thing on your mind. But it could be the first thing to put you at serious financial risk because you never know when a serious injury or illness will strike you. For information on purchasing this optional health plan, call (800) 853-5899 or visit the website: www.csuhealthlink.com
